

## Sukellustangot

no. W1-IL1137008

Set of 6 coloured plastic bars that sink slowly and vertically onto the bottom and stay there. 100g, approx. 21cm

## Vedenalainen slalom

no. W1-IL1120804

A completely new diving game for people of all age groups with many uses. It is a fun way to improve diving skills. The 150 cm long plastic bands have an incorporated float and are filled with ballast on the lower end

## Vesijalkaharjoite

no. W1-IL1137806

Soft PE foam leg floats, very comfortable to wear. Although a uni-size, the buckle bands with eyelets ensure a perfect fit. With good floating properties for water jogging and aqua fitness.

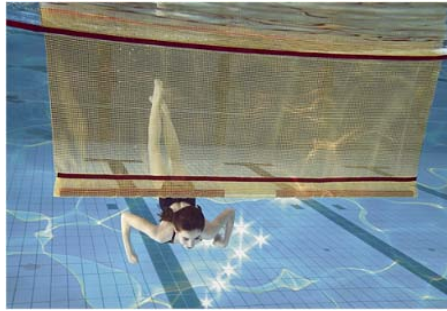

## Vedenalainen askelma imukupeilla

no. W1-IC1129638

Stands very well because of the suction cups. Strong plastic step. 67x35x17cm, approx. 6 kg, including suction cup.

## Sukelluseste

no. W1-IL1120905

The obstacle consists of an orange net, 2.10 m long and 70 cm high. It can be hung between two starting lines or on the left and right of the pool with 2 tension lines. The lower part of the net is filled with plastic rods to make it more stable in the water. Comes with storage bag.

## Uimalauta

no. W1-IL1141001

Used with the attachment, this board is especially suitable for back and chest training as the body is at an optimal stretch when gripping the board. The seven ergonomically designed holes in the board mean there are numerous uses for this board in water gymnastics. Made from Plastazote. 49x29x3.8 cm

## Vesikäsipainot

no. W1-IL2273408

With removable foam discs.

- Multi-functional weights, offering variable resistance for the most different of exercises.
- The Tri-Blade technology ensures water resistance in every direction.
- Weight bars made from high quality plastic.
- Two discs per weight included
- Removable, variable and made from foam with a coating.

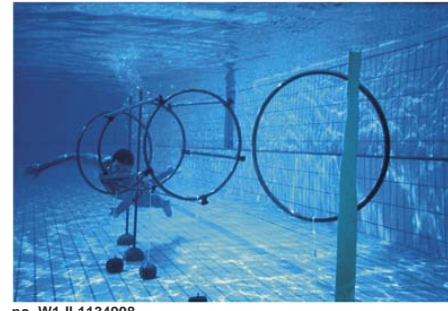

## Vesi Cross-Trainer

no. W1-IC2179100

The newly designed Aqua Cross Trainer is suitable for all-round highly efficient training in shallow and deep water. Used for strengthening as well as stretching and loosening muscles in equal proportions. Improves flexibility, strength, coordination, balance and stamina. Useful for balancing out disharmonies and stabilising tissues. Trains the trunk, back, stomach, legs, buttocks, shoulders and arms comprehensively. Joints can be mobilised without any stress on them. The water works as pedal resistance: the faster you pedal, the higher the resistance and calorie usage. Made from high quality flexible yellow foam, 130x20 cm, suitable for bodyweights up to 75 kg.

## Sukellusrata

no. W1-IL1134908

Central to the obstacle course is a challenging diving pipe. The garden consists of slalom rods with filled bases, slalom diving bands and diving rings and can be changed to suit different depths and distances by adjusting the weights

## Uintivarjo

no. W1-IC2246808

- Swimming training aid for strength and stamina
- Parachute is firmly attached to the belt
  - Parachute comes in three diameters: 20 cm, 30 cm and 40 cm

## Vedenalainen askelma

no. W1-IL1129609

Training with Aqua Step will increase your muscle strength and stamina, and your co-ordination. It can also be used for stretching and stability exercises. Shockproof plastic, very robust and stable underfoot because of the rubber stoppers on the standing area, height adjustable. Recommended water depth between 80 and 150 cm. Includes built-in galvanised weights (2x 1.4 kg), approx 68x36x19 cm, total weight 13 kg.

## Vesikävelysauvat

no. W1-IL2137403

Following on from the Nordic Walking developments, these sticks offer a welcome change for developing stamina in a joint friendly way. Aquatic Walking Sticks will help strengthen the upper body and provide reciprocal impulses for the right and left hand side of the body when running and walking in the water.

## Säilytyshäkki

no. W1-IL1146019

- Ideal for storing Comfy Floats, swimming boards and smaller items in the plastic baskets.
- Fully galvanised trolley.
- Includes comprehensive assembly instructions..
- 115x65x161 cm.

## Säilytysvaunu

no. W1-IL2108706

Mobile plastic trolley for transporting up to 40 Comfy Floats without any bother. Open design therefore the water flows off fast. 60x40x106 cm.

## Vesivoimavarsi

no. W1-IC2041009

A whole body training product. The Power Stick is 75 cm long with flexible handles. Ideal for both shallow and deep water with exercises for coordination and balance. Delivery includes a set of exercise instructions and DVD in German

## Vesimelontalevyt

no. W1-IL2089805

A 25 cm diameter plastic disc with a holding bar through the middle. Ideal for aqua fitness and aqua gymnastics. The easy to bend shape is great for trunk training in chest deep water. You simply position yourself with the discs to twist in the water or to push lightly to the side or front. Each disc weighs approx 450 g.

## Jalka / käsivarsivastukset

no. W1-IL2000709

A new product for strength training and body shaping in aqua fitness. Two floats are fastened to a wrist band and velcro bands can be attached to wrist or ankle to increase the resistance. The set consists of 2 complete floats and a carrying and storing net.

## Vesitrampoliini

no. W1-IL2241601

A new type of sport has begun: Aqua BounCing, rebounding under water. The first trampoline for „swing jumps“ underwater. New and innovative for all aqua fitness enthusiasts. Frame structure, 28 steel springs and four V4A stainless steel removable bases. Suction base made from chlorine water resistant rubber mixture. Jumping sheet (73.5x73.5 cm) made of PVC coated mesh material. Shock absorbing frame padding cover made from high quality neoprene sewn into jumping sheet, 19 cm wide, 5 mm thick. 100x100x27 cm. 15 kg. Including demonstration DVD

## Vesitrampoliini Shark kaiteella

no. W1-IL2273020

- Shark Jumper is made from high quality stainless steel.
- With six suction holders

- **Aqua-Jumping** works the whole muscular system
- Activates the heart, circulation and lymphatic systems
- Develops balance and coordination
- The buoyancy of the water relieves pressure on the joints
- When jumping on Shark Jumper in the water there is even more relief for joints than jumping on a normal trampoline
- Tension is released
- Stress is reduced
- Happiness hormones are released

Shark Jumper offers the perfect prerequisites for getting children active, aqua fitness and rehabilitation sport.

- Suitable for shallow water

### Material:

- High quality stainless steel
- Jumping sheet: TÜV approved chlorine and saline resistant

- Total diameter: 102 cm
- Jumping sheet ø 75 cm
- Height 26 cm
- Weight: 9 kg.

## Tasapainolauta

no. W1-IL1277702-1

With this disc you can use the resistance more effectively, from water gymnastics to rehabilitation, therapy and fitness. The holes in the disc allow the water to flow through at a controlled rate, making training exercises while floating on the surface of the water or at the bottom of the pool possible. ø 40 cm, height, 9 cm Comes with instructions for use.

## Vesikoripallo

no. W1-IL2303606

- Non-rusting plastic structure
- Upper supports and ring are made from flexible plastic tubing
- The complete unit comes on an inflatable holding tube made from 0.5 mm thick plastic film
- Fixing eyelets welded onto the tube (ø 105 cm)
- Comes with nylon net
- Ball not included

## Vedenalainen palapeli

no. W1-IL2041504

Consisting of 12 pieces with a fish design. The individual plastic pieces sink to the floor and must be assembled on the floor of the pool. Challenging and fun for all your pool guests. Size when completed 90x75 cm.

## Vesitarkkuusheitto

no. W1-IL2240204

A fun water rings game for everyone. A stiff, anti-slip material made of closed celled PE foam. Very buoyant and consistent. Height 100 cm, ø 48 cm.

## Kelluva saari

no. W1-IL1125900

Now this is real fun! Extremely durable island made from lorry tubes, which are joined using a double cover of strong canvas. It will withstand even the wildest games and the new design is extremely attractive. Its stylishness and cosiness set this swimming island apart from the others, ø approx. 130 cm, height approx. 30 cm.

## Pyörivä saari - Pinky

no. W1-IL1148800

The island is anchored using a rotating joint, meaning that even though Pinky is anchored, it can still turn, ø 2.60 x 0.25 m, approx 7 kg. One suction holder [IL1148305](#) is necessary for anchoring.

## Vesilentopallo

no. W1-IL1127007

Made from aluminium with tournament net and tensioning, 240 cm long. It can be dismantled, is easily assembled and does not tip over thanks to the stabilising system. This set can be used at all depths for volleyball teams of up to 4:4. Order includes aluminium bars, five floats, one net and tensioning cord. Ball not included.

## Uimalauta - Jive

no. W1-IL1123803

A wave rider made from soft but very shockproof plastazote® foam. It can be used as a swimming, sitting or sliding board. Comes in two colours, 95x48x5 cm.

## Kelluva polku

no. W1-IL1123601

**Simple to use and with universal applications.** It can be used as a slide, bathing island, water catwalk, ideally suited for **getting people at ease in the water, small children's swimming, club and school sport** as well as **special celebrations**. Another advantage is that any number of floats can be combined, depending on what you require, to make a "walking plank". It is simple and easy to do. Just attach the first float to a starting block or overflow channel and attach the rest using the four links provided. The perfect solution for **balance exercises**. 215x100x5 cm

## Imukuppi

no. W1-IL1148305

For anchoring the water objects to the pool edge or floor. Will hold up to 80 kgs. Total length 32 cm, ø of each suction holder 12 cm.

## Vesipallomaali

no. W1-IC1126903

Universal for many school and leisure games. They can be used in the deep end, shallow end and on the edge of the pool. Strong aluminium construction with net. Ball not included. 96.5x71x61 cm.

## Vesirakennuspalikat

no. W1-IL1149308

Even the smallest of children will have fun with this play brick set. Using only a few bricks, simple shapes can be made. They put no limits on creativity and imagination. Manufactured from plastazote®, which floats, is unbreakable and totally non-toxic (no gas or poisons). The set consist of 48 bricks 18x9x4.5 cm in yellow, green, red and blue.

## Kelluva puunrunko

no. W1-IL1149513

This floating imitation tree trunk is specially designed for children and young people. Anyone who sees it will immediately want to play with it. Size 200 cm long, ø 16 cm.

## Vesirengas

no. W1-IL2041100

Absolutely robust, can also be used on land

## Vauvojen liukumäki

no. W1-IL1121823

The slide is sized perfectly for safe use to encourage children over 6 months of age to swim. As well as the fun effect there are particularly beneficial functional features of the slide such as the stimulation of the balance system and of the hip muscles. This slide is made from strong canvas with 6 separate air chambers with non-return valves and higher side walls for increased safety. The integrated standing flap gives the overseer extra safety. 130x70x60 cm.

## Vesiliukumäki

no. W1-IL1125102

An attraction for all pools both indoor and outdoor. Offer this product to your customers and you will see that this slide is a magnet and that the investment will quickly pay for itself. The whole construction of the product complies with all valid regulations. A minimum of 70 cm of water is required. Easy care fibreglass material, metal parts made from V4A stainless steel. Platform height 110 cm, slide length 250 m, total length 360 cm. White or red-orange RAL 2002 (special colours available on request).

## Vesipallomaali - Verkko

no. W1-IL1127906

Polyethylene, 3mm

## Kaulatuki

no. W1-IL1136308

For adults, made from skin friendly PE foam with Velcro fastening. Very safe as it is comfortable to wear and has good buoyancy. 44x27x10 cm. Support up to approx. 60 kg and holds the head very well above water

## Vesikävelytuki

no. W1-IC2240406

For walking exercises in the water. Particularly suitable for therapy and rehabilitation in the water. The floating bar will support the user when running the water. Both user and "bars" glide along on the water together. 125x85x10 cm.

## Sukellusharjoitteet

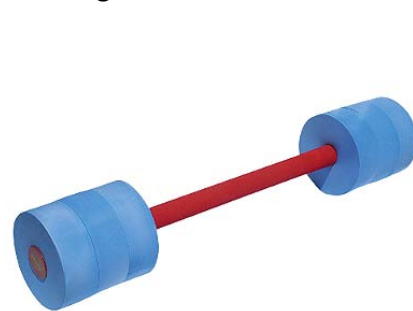

no. W1-IL2090320

The set consists of:

- A fun way to learn swimming and diving techniques. Throw the balls into the pool and collect them with the hungry shark. Rubber balls and bar. The set consists of six balls and two bars.
- Set with four sea lions in a plastic bag. Three symbols with sea lions and one symbol with fish. Dive for the fish symbol.
- A set of four colourful stones that glow like jewels in the water. Once the stones are pressed they are activated and start to flash and turn fluorescent. Children should dive in and retrieve the stones. Last approximately 50 hours. These stones come in a nylon storage bag

## Vesitangot

no. W1-IL2179009

You will increase your water resistance with these water jogging dumbbells. Ideal when combined with stamina and strength training in water. Made of EVA foam, 78 cm long.

## Pelastussauva

no. W1-IL1142105

Made from light alloy tubing, ø 4.2cm catching loop firmly attached, extremely durable.

## Vesipallomaali - alumiini

no. W1-IL1127603

3x0.9x1.35 m stable construction, 80x40 mm posts, real stoved enamel finish in white, folds together, therefore saves space in storage. The goal is screwed together, with non-rust net hooks and net hangers. Unsinkable because of foam in the forward tilting floats. Free floating.

## Sukellusharjoitteet - kuviot

no. W1-IL2010609

These bright products are easily seen and motivate diving. Diving and orienting yourself in the water can be learned the fun way. Consisting of 6 "animals": frog, flower, tortoise, seal, starfish and fish. Animals are approx. 15-20 cm long and 10-15 cm wide

## Trainer

no. W1-IL1466906

The classic for aerobics and aqua fitness. Very versatile weights. They can be filled to meet the user's need and therefore allow the exercises to be designed personally. Weight varies from 400 g to 5 kg, depending on filling. Fill with water, sand, iron chips, lead shots, etc.

## Kelluntatanko

no. W1-IL1129915

Super soft and flexible swimming belt. This belt will hold an adult over the water without any problems. When used with the belt this noodle can be used as a swimming collar. 155x6x6 cm, blue.

## Vesipallomaali - reuna

no. IL1127616  
For fixing to side of pool

Pool edge fixing set for sockets with internal  $\varnothing$  34 mm. Comes without sockets.

## Vesipallo

no. IL1080908

Plastic with easy to hold surface. Weight and circumference, complies with regulations. This ball weighs approx. 450g.

## Vesipallomaali - kelluva

no. IL1127629

"Neptune special" free floating, 3x0.90x1.6 m. A stable construction thanks to the tried and tested special 75x40 mm profile in combination with aluminium sheeting (edged) floats. As the floats are extremely wide, the goal sits very stable on the water. The rear can be folded up, cross bar and posts are white, float red, baking varnished, comes with net hooks, hangers, floats and calibration weight.

## Pelastuspouju - Baywatch

no. IL1140910

The original top quality Baywatch style rescue torpedo!

- Foamed thermoplast material for lasting propulsion
- 66x23x12.5 cm
- 1.5 kg
- Complete with rope and shoulder band
- Recommended for outside use.

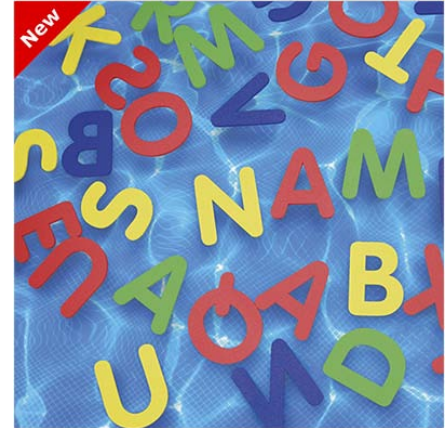

## Turvapallo

no. IL1141405

Styrofoam  $\varnothing$  30 cm, strong plastic net with strong loop for holding a rope, also useful for swimming lessons. 2,8 or

## Vesiaakkoset

no. IL2303707

Alphabet Soup has many uses in play.

The letters float on the surface of the water and stick to glass, mirrors or tiles when wet.

The set with 55 letters made from certified foam as follows:

- 4 each of A, E, I, N, R, S
  - 2 each of B, D, F, G, H, K, L, M, O, T, U
  - 1 each of C, J, P, Q, V, W, X, Y, Z
- in four colours: red, yellow, green and blue.

For creative games and learning. Particularly suitable for swimming pools, care centres and pre-schools. The letters are 18 cm high, 10 mm thick.

This makes them very easy for small children's hands to hold. Alphabet Soup is packed in a waterproof polypropylene hollow chambered box, approx. 44x27x21 cm

## Vesinumerot

no. IL2303808

A fun way to learn numbers.

- A great addition to Alphabet Soup
- The numbers float on the water.
- Set with 11 numbers consisting of 1x 0-9 and 2x 1"
- Made from yellow polyethylene foam
- Yellow
- For creative learning through fun and games
- Particularly suitable for swimming schools, swimming pools, care centres and pre-schools.
- The numbers are 18 cm high, 3 cm thick

## Uimalauta - Kala

Article no. IC2270803

Provides the perfect swimming position for beginners.

- Due to the structure, children will get into the optimal swimming position with this board as they can hold onto the float with the side supports.
- Three holding options for the perfect position on the water and larger children can lie flat on the water surface with outstretched arms.
- The board is stable and very unlikely to tip over.
- 70x48x5 cm
- Suitable for children over 2 years of age.

## Uintivastus

no. IL2256405

The patented world first for every swimming pool. • The economical alternative to counter current products.

- Simple and quick for self-assembly.
- Suitable for every pool and for every age, from beginner swimmers to top level sports people.
- Stable special steel structure.
- Ergonomically shaped. Salt and chlorine water resistant.
- Weather resistant powder coating.
- Optimal for use in swimming clubs, public pools, outdoor pools, fitness centres and hotels.
- Delivery includes rope, belt and assembly material.

## Vesikävelysauvat - suppilo

no. IL2301903

- The ideal aqua training product for Nordic Walking in shallow flat water, Nordic Jogging in deep water or for Nordic Aqua Fitness while standing.
- The Nordic Aqua Handles allow movement sequences typical to Nordic Walking and classic cross-country skiing, as well as similar use of the upper body and arms as in many forms of Nordic sports.
  - Two ergonomic Nordic Walking handles with adjustable hand loops.
  - By simply holding in the furthest forward position the funnel will point to exactly the correct starting position for "operation of the stick".
  - The flow dynamics of the plastic funnel creates higher water resistance in one direction and only low resistance in the opposite direction.
  - Because of the funnel shaped beaker opening a type of power and pressure input is produced, which is not possible with other buoyancy products
  - Orange.

## Vesitrampoliini - Shark

no. IL2273004

- Jumping makes you fit and happy. The new type of aqua fitness training.**
- Shark Jumper is made from high quality stainless steel.
  - With six suction holders

- **Aqua-Jumping** works the whole muscular system
- Activates the heart, circulation and lymphatic systems
- Develops balance and coordination
- The buoyancy of the water relieves pressure on the joints
- When jumping on Shark Jumper in the water there is even more relief for joints than jumping on a normal trampoline
  - Tension is released
  - Stress is reduced
  - Happiness hormones are released

- Shark Jumper offers the perfect prerequisites for getting children active, aqua fitness and rehabilitation sport.**
- Suitable for shallow water

### Material:

- High quality stainless steel
- Jumping sheet: TÜV approved chlorine and saline resistant

- Total diameter: 102 cm
- Jumping sheet ø 75 cm
- Height 26 cm
- Weight: 9 kg.

## Vesikuntopyörä - Shark

no. IL2089603

The latest in aqua fitness: Aqua Cycling.

- Aqua Cycling is the new trend. It is ideal for the body and circulation. This stationary bike is made from 316l stainless steel and is only suitable for use in water. Its simple design and handling will convert even practised fitness fans. The water's resistance when aqua training is much higher than if training with air resistance. This means:
- you will reach your training target faster and with less stress on your body
  - the massage effect will help circulate blood in the skin, connective tissues and muscles
  - you will profit from the training which is excellent for mobility and coordination
  - your heart and lung functioning is improved
  - quicker regeneration after injuries and operations

The many uses of the Shark Bike make it an excellent training product. It is perfect for group training, physiotherapy, rehabilitation, personal fitness training and professional sportspeople such as triathletes.

## Vesikäsimastus

no. IL1495502

- Up until now Gymstick training was only possible over water but with the "aqua" you can now get the special benefits of Gymstick training in the water. The 117 cm long fibreglass bar has a pleasant waterproof handle. The tubes correspond to the Original Thera Band thicknesses.

## Vesikuntopyörä - Hydro

no. IL2254500

The economical alternative in the aqua cycling for aqua fitness providers, wellness centres and spas, swimming schools, hotels and private pools

- Made from rust-free steel, simple to handle
- The resistance can be set at three levels.
- Saddle and handlebars can be individually vertically and horizontally adjusted
- Versatile for a motivating healthy and joint friendly fitness training session in the water
- The ideal pool depth is 110-145 cm
- 130x60x140 cm
- 22.5 kg.

## Uimatanko

no. IL1127209

- These bars were developed with fun and learning in mind but it soon became obvious what other great uses can be made of the swimming bar. The octagonal floating foam pads are connected to a strong bar and can be used as a building block and are very versatile. They can be a goal mouth for games, mark off an adventure diving area or be combined to mark off swimming limits. All the swimming bars need is imagination.

## Uimalauta - sammakko

no. IL1127704

For more fun in the pool. This colourful toy will add more colour to your pool and is a great source of new ideas. Made from high quality plastazote® foam, skin friendly and free of toxins and gases. 92x64x5 cm.

## Pallovuori

no. IL1125506

**Climbing on the ball mountain ... no one can resist!**  
DBGM approved. A climbing product that consists of balls of different sizes held together in a nylon net piling up into a huge mountain. The strong net can be easily gripped and will survive even the wildest of antics. You can of course, just use the balls individually. The mountain is made of 10 different sized balls in a 3 mm thick nylon net with mesh (30 mm wide) that is simply closed up. Recommended minimum water depth: 1.50 m

## Dinosaurus saari

no. IL1148709

400x250x100 cm, approx. 20 kg. One suction holder [IL1148305](#) is necessary for anchoring. The prescribed water depth for the non-swimmer pool is at least 100cm

## Krokotiililautta

no. IL2010452

Do you want to spread "alligator" dread and ride on the crocodile. A water fun object made from high quality special foam. 175x65x18 cm.

## Saarilautta

no. IL1148103

400x400x50 cm, approx. 45 kg. Two suction holders [IL1148305](#) are necessary for anchoring.

## Lohikäärme

no. IL2232111

Fun water attraction that many children can use at the same time. The small dragon "rides" over the water and provides great fun for children. Made from special high quality foam. 100x100x75 cm.

## Käsipumppu

no. IL1100105

For inflating and deflating particularly large balls and objects such as push balls, inflatable rafts, pezzi balls etc. Output per stroke 2x2000 cm<sup>3</sup>.

## Krokotiilisaari

no. IL1149005

800x260x35 cm, approx. 50 kg. Two suction holders [IL1148305](#) are necessary for anchoring. The minimum prescribed water depth is 200cm.

## Pelastusrenkas

no. IL2068129

Manufactured from hard plastic. Corresponds with EN 14144. 75x45 cm, 2.5 kg for day/night time marking, comes with four reflective stripes and a holding rope the whole way round. 14.5 kp load bearing capacity.

## Uimakäsिमela

no. IL2301802  
PT Paddles - Perfect technique in the water.

Swimming is not the most natural form of motion and as a result, technique can be more important than physical strength and health. Effective swimming involves the use of the whole body working with the water, not fighting against it.

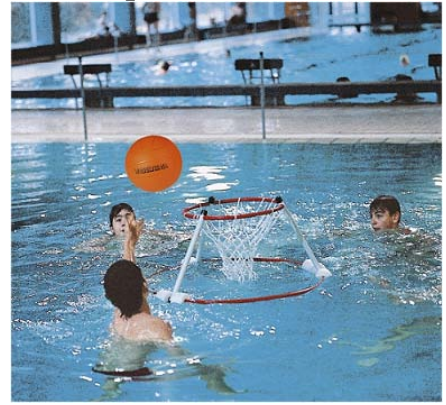

- PT Paddles help to find the perfect technique in the water and to further develop it.
- They improve coordination, give a better sensitivity for the water, pulling power and stroke length.
- Made from durable PU material.
- Structured surface for improved hold.
- Universal size.

## Megafoni

no. IL1146107  
20 watt output. Handy design. light, for halls and external use. Will reach up to 250 m, 33 cm long, no siren. Batteries not included. Weight: approx. 2kg.

## Vesikoripallo - Perus

no. IL1127108

Great fun for everyone, big or small, in schools, clubs, or leisure time. Suitable for swimmers and non-swimmers, can be used anywhere, easily assembled and very stable. Plastic ring with floats, basket frame and net. Ball not included. The rings are 88cm in diameter.

## Vesikävelyteline

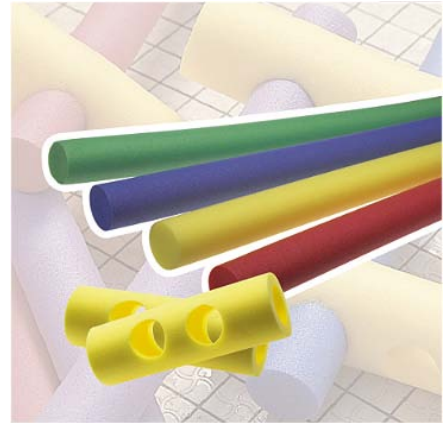

## Uimalauta - Tupla

no. IC1134100  
As "Classic" but with more buoyancy. Ideal for water gymnastics. Size: 49x30x6 cm.

## Vaahтомуovi - kokoelma

no. IL1132016

### Fun and games with Comfy Float!

This set will make your pool into a play paradise for your little guests. There is no end to the combinations that can be made. This will make your pool more attractive and the set will pay for itself in no time.

### The set consists of:

- 20x Comfy Floats (4)
- 24x connection pieces (1)

Materiaali: rustfrit stål 316L  
Bassindybde 100 - 140 cm.  
Mål: 68 x 147 x 131 cm.  
Vægt: 38 kg.

## Vaahтомуovimatto

**no. IL1132104**

With 8 holes for Comfy Floats. Another part of the Comfy family. Very suitable for areas that can be wet or dry, made from strong closed cell polyethylene foam. 150x50x3 cm.
