

The training clock with minute and second hands lets you see the intermediate times in swimming training and warm-ups. Each swimmer takes their own times.

Casing:

The standard version of the training clock has a strong, white metal casing (RAL 9016) which has an IP protection category of 54 (N 60 529). The clock casing is also available in metallic silver at an extra cost. (White aluminium RAL 9006) or is available in other colours on request. Stainless steel matt finish V4A casing (1.4571 X6CrNiMoTi 17-12-2) also available at an extra cost. This stainless steel version is also saltwater and chlorine resistant.

Casing dimensions:

- HxW: 600x600 mm
- Depth approx. 120 mm

Clock face:

Very clear, easy-to-read metal dial, painted white with red/black second increments and black digits. Can be read from at least 30 m.

Hands:

Minute hand painted black. Second hand painted red with "eyelet". Jumps forward every second.

Front glass:

Unbreakable plastic glass made from Makrolon® (polycarbonate).

Versions:

Battery operated 1.5V with carry handle

(2 x 1.5V alkaline, mono cells/LR 20, batteries included). Transportable, suitable for use anywhere. On/off switch on the back. Can be put at the pool edge (2 rotating bars ensure secure positioning) or hung on the wall.

Mains operated 230V, only for wall mounting

Recommended for continuous use and/or if a fixed location is required. Only for mounting on a wall and for plugging into a socket. Includes 3-point safety fixing.

Can also be used as a wall-mounted master clock. Friction controlled 24V for (fixed) connection to a central control unit. Recommended for synchronising parallel timing of two training clocks (at a fixed location). Delivery includes a 3-point cable fixing safeguard. A control system is necessary for operation and is available on request.
