

Scuba

The Scuba is an immersible test device which uses a similar technology to that used in public pools.

A sample of the water is tested using the photometric principle and the result is shown in the digital display. Compared to visual pooltester systems this eliminates the risk of wrong colour readings.

Following Scubas are available:

Item	Order code
Scuba	21 60 00
Chlorine (free + total) 0–6 mg/l pH value 6.5–8.4 / Stabilizer 0-80 mg/l	
Scuba	21 60 20
Chlorine (free + total) 0–6 mg/l pH value 6.5–8.4 / Alkalinity 0-500mg/l CaCO ₃	
Scuba +	21 60 10
Chlorine (free + total) 0–6 mg/l Bromine 0-13mg/l / pH value 6.5–8.4 Stabilizer 0-80mg/l / Alkalinity 0-500mg/l CaCO ₃	

Highlights

- » Watertight housing
- » Digital display
- » Rapid-dissolving tablets
- » Weight only approx. 100 g

The operation is shown illustrated on:
