

## **The BPM Aquabike "Two": New! Exclusive Italian design. The stable fitness bike for power cycling in the water**

The BPM Aquabike "Two" is a stationary bike for high-performance activities in either public or private pools. The high-quality processing of materials and the stainless steel frame with an oval profile make the Aquabike extremely sturdy. The new braking system guarantees improved flow characteristics. In addition, the resistance pedal made from polyethylene enables more fluid movements and more power. The painted handlebars provide an improved grip and can be manually set to a larger number of positions. Thanks to the rollers on the front legs, the bike can be transported quickly and easily. What's more, four transparent suction cups make the bike particularly stable. The BPM Aquabike "Two" is available in red, green and yellow.

### **Product information:**

- Polyethylene and stainless steel frame
- Assembled dimensions (LxWxH): 144x123x60.5 cm
